

UPE Kick off

Moving the working document for the Workshops to this Loop Page so that everyone can keep uptodate without me updating the invitation each time.

Purpose of the workshop

1. UPE kick-off (Aligning requirements/expectations and establishing the operating model)

This session is about moving UPE from concept into a structured, shared direction. Specifically, we will:

- Align on key requirements from each GBA (A lot of this can be homework , we focus on alignment in person)
 - GBA requirements workspace [here](#)
 - Water GBA requirements received (thanks Marketta)
 - Transport GBA requirements received
- Agree a governance model (steering group, decision-making, information flow, single source of truth)
 - Agree on KPis/Success metrics
 - Governance Workstream page [here](#)

- Agree on the Workstreams and ownership
 - Main workstream page [here](#)
- Define how we manage the backlog and prioritization at platform level
- Have a high-level discussion on delivery approach, including technology and architecture principles

GBA requirements input will be a central part of this and will need appropriate time to present/prepare.

2. Digital Design & Production chapter kick-off (community focus)

As heads of Digital Design & Production, you are the core of this chapter. This part of the workshop will focus on (below are some of the topics that are GBA overarching and have a strong signal):

- Welcome
- How we approach innovation as a group - How we use pilots and proof of concepts effectively, versus what should be handled centrally, entrepreneurial vs controlled etc
- The Role of AI in transforming Ramboll's way of working, are we moving to slow/too fast - Rd map for AI in the DD&P ?
- Autodesk Partnership update and way forward with ADSK AI capabilities (Poul)
 - Scale and industrialise ADSK solutions - needs
- Your DD&P chapter topics here....
- How this chapter works in practice (collaboration model, knowledge sharing, and expectations - updating the DD&P Charter document as we see fit)

Agenda

UPE Kick off

0800-0830 Short welcome and aim and objectives

0830-0850 Lets get aligned on what is UPE?

BREAK

0900-1100 Presentations of GBA Requirements

1100-1215 Aligning on Workstreams and Priorities (option to extend into afternoon sessions).

LUNCH

DD&P Chapter Meeting

1300- 1430 GBA DD&P Hot topics

1430-1500 Autodesk Updates

- Autodesk Partnership update and way forward (Poul)
 - Scale and industrialize ADSK solutions - needs
 - maximizing value from ADSK AI capabilities
 - Coordinating AU attendees and value extraction

1500-1520 Geospatial Updates

BREAK

1530-1540 ACC workflows Sneak Peak

1540 -1600 Ways of Working, Including advance planning of in person sessions Week 23/34 to catch David C

travel to EU.

1600- 1700 Outstanding matters

Proposed format (assuming most of you will travel in the day before and some will leave the day after due to other RHO meetings)

- Arrival: Monday Evening informal dinner for those who can make it at approx. 1930 location TBC
- Workshop: two half days Tuesday the 23rd, with a possible third half day the following morning for wrap-up and spillover topics (I will be in RHO till Thursday)
- Remote attendance possible via Teams and recording

Your input needed

Before I lock the agenda, I'd really value your input on:

- Any must-cover topics related to UPE from your GBA perspective
- Key challenges or opportunities you see for Digital Design & Production across GBAs
- Anything you feel we should *not* try to solve in this session

If you could send thoughts in the coming days, I'll shape a draft agenda and circulate it for final alignment.

Looking forward to kicking off these 2 key topics and meeting some of you in person.

Best,

David
